RENOLIT ALKORPLAN TOUCH/CERAMICS/2000/3000
Reinforced pool membrane for on site lining

Make your swimming pool fashionable
If you want an attractive pool that will give you no problems, RENOLIT ALKORPLAN reinforced liner is the perfect product to achieve this.

[Image: Reinforced membranes are the most widely-used pool liners in the world]

We offer you the pool of your dreams.

No more detached mosaic tiles.  No more black joints.  No more flaking paintwork.

Minimum maintenance... and very easy to clean!

No matter what your garden looks like RENOLIT ALKORPLAN allows you to create an unique, customised area just for you.
RENOLIT ALKORPLAN is the only reinforced liner that can guarantee the waterproofing of your pool, regardless of its location.

How many reinforced pool liners are able to overcome this test?

RENOLIT ALKORPLAN allows you to enjoy your pool in peace, without worrying about leaks.

Compatible with almost any material!

RENOLIT ALKORPLAN is the perfect liner for rooftop pools, basement pools or in any place where there are cracks or micro pores that could cause damp, water leaks or flooding.

GUARANTEE
WATERTIGHTNESS
10 YEARS
Many hotel pools, Olympic pools or aquatic park pools in Europe have RENOLIT ALKORPLAN liners installed in them, as apart from requiring minimum maintenance, they guarantee complete water-tightness and it is possible to install them in half the time it takes to install other systems.

- It can be installed on any surface.
- Clean installation, with no noise and in half the time it takes to install other liners.
- It requires practically no maintenance.
- No matter the size and shape of the pool.
Although the installation of RENOLIT ALKORPLAN is fast and easy, it should always be installed by qualified professionals to ensure a completely watertight finish.

If you have any questions or need more information, please contact us at www.alkorplan.info
Only RENOLIT ALKORPLAN is marked on the back ... Check it!

Fast renovation!

For all pool sizes and shapes!
Reinforced membrane ranges for all tastes...

PREMIUM Range

RENOLIT ALKORPLAN TOUCH

Reinforced liner with exclusive 3D designs and prints, inspired by nature.

RENOLIT ALKORPLAN TOUCH reinforced membrane reproduces natural textures and gives personality and character to pool linings, making them unique and original.

It’s the pool liner revolution!

Are you aware of RENOLIT ALKORPLAN TOUCH?

The reinforced membrane RENOLIT ALKORPLAN TOUCH fulfills the two fundamental objectives of a swimming pool:

1. Assure a completely watertight structure.
2. The most beautiful finish possible.

The reinforced membrane is the most visible element and will make your pool absolutely unique and exclusive.

RENOLIT ALKORPLAN TOUCH protects your garden and home against possible flooding by pool water. Even if the substructure is cracked, the water will always remain where it should be ... in the pool.

In addition, the relief designs of RENOLIT ALKORPLAN TOUCH give character to any pool and allow you to create a unique and individual space in your garden.
RENOlit Alkorplan TOUCH

Reinforced liner with exclusive 3D designs and prints, inspired by nature

You will turn your home into a haven of design and character

RENOlit Alkorplan TOUCH is the first reinforced membrane with a heavily riven stone finish. At 2mm thick it is the strongest and most resistant liner in the market. The imaginative design of the liner makes it the most appropriate element for adding a personal note to your pool and making your home a unique place.

The TOUCH liners emulate nature through adding a simulated stone finish to exotic baths, adding personality and singularity to the pools in which they are used, making each pool unique.

You will have a unique and exclusive pool!
Elegant and timeless - delicate texture - metallic hints.

Inspired by one of the most noble stones in nature: granite.
Spectacular, ostentatious white Marble Swimming Pools that will be the Pride of the Owners.
RENOLIT ALKORPLAN TOUCH Sublime

Imitative of travertine limestone that creates pools with warm reflections ideal for exclusive and naturalist settings.

RENOLIT ALKORPLAN TOUCH Prestige

A liner that creates a pool which invokes a volcanic rock paradise, conceived for designer and minimalist settings.
Luxurious, seductive, unique pools in deep blue tones that will captivate you at first sight and turn your home into an elegant palace.
Sensual, exotic pools with golden sand and brilliant turquoise reflections, that will take you to the remote beaches of the Caribbean.
Rustic pools with exquisite stone textures, creating different tones in the water, brilliant and colourful, perfect for natural settings or country gardens.
No detached tiles or crumbling grouting!!

Ideal for new pools and for renovations!
It is installed over the existing substrate in half of the time than other linings.
It guarantees the watertightness for 10 years with minimal maintenance!

RENOLIT ALKORPLAN CERAMICS, a 2mm embossed pool liner for swimming pools with the aesthetic appeal and texture of the mosaic tiled designs of Greek Myths.

With the most careful aesthetics and with many advantages over any existing pool liner in the market:

1. Guaranteed watertight.
2. Quick and easy installation compared to glass mosaic tiling.
3. No fallen tiles or crumbling grout.
5. The 2mm thickness creates a more durable and resilient membrane.
6. Easy to weld with an immaculate finish.
Selene, moon white, will captivate those who contemplate its celestial waters as the colour of the sky on a summer day.
With sober and elegant nuances, Etna makes the pools spectacular and formidable.
Of a totally new colour in the world of swimming pools, it offers a delicate and subtle turquoise spectacle.
Of an intense blue, so warm, so deep and so ours.
Atenea gives the water a shine and a unique hue.
Pools that are crystal clear, luminous, fresh, and always elegant, to allow you to enjoy the sun and the summer.

Elegant, sensual and eternal pools that will add a note of prestige and beauty to your garden.
Classic pools that always look good are always the best choice.
RENOLIT ALKORPLAN3000 Persia Sand

Pools with soft, elegant colours that give off light and harmony, making bathing a treat for the senses.
Elegant, distinguished pools that invite you to bathe in them, transmit wellbeing and never go out of fashion.
RENOLIT ALKORPLAN 3000 Carrara

Happy pools with bluish tones and elegant prints, perfect for pool shells with irregular shapes or those with flaws.
RENOLIT ALKORPLAN3000 Marble

Deep blue pools with spectacular glints that attract all gazes, making bathing a pleasure.
Pools with modern, spectacular designs, with brilliant glints, that will be the most prized jewel in your garden.
Butt welding

RENOLIT recommends to practice the Butt Welding on the pool floor on TOUCH and CERAMICS membranes for an impeccable finish of your pool. Aesthetically, especially in swimming pools made with RENOLIT ALKORPLAN TOUCH or RENOLIT ALKORPLAN CERAMICS membranes with Butt welding in the pool floor, the welds become practically invisible.

NOT ALL GEOTEXTILES ARE THE SAME!!

RENOLIT ALKORPLAN geotextile is made of blue polypropylene, which is rot-proof, and always marked with the RENOLIT ALKORPLUS brand.

Advantages:

1. The fungicide treatment prevents the proliferation of bacteria under the membrane.
2. The geotextile disguises any small imperfection that may exist in the structure of the substrate under the membrane.
3. Adds a much more comfortable feel for the bather.
4. Helps to maintain the temperature of the pool water.
5. Plays a key role in the butt welding system.

*Specific for butt welding.

The RENOLIT ALKORPLAN geotextile is one of the essential elements for the butt welding.

Swimming pool without Butt welding nor geotextile.

By day and with moving water, the welds cannot be seen.

If this swimming pool had been installed with the butt welding system, the joints of the pool floor would have remained invisible.
Advice for conserving your RENOLIT ALKORPLAN liner

Carry out a daily test to ensure the the chlorine level is 1 ppm and that the pH is between 7.0-7.6.

If you disinfect your swimming pool with chlorine or with a salt electrolysis machine it is essential that the level of the chlorine is 1 ppm and the pH level is between 7.0 and 7.6.

If you disinfect with bromide the level should be 1 ppm and the pH level between 7 and 8. Excessive use of bromide can cause the liner to become brown in colour.

If the pool has a salt chlorinator you must add stabilizer at the beginning of the season

The chlorine generated by the saline electro chlorinator is stronger than normal chlorine.

To dilute add 30ppm of a isocyanuric acid stabilizer at the beginning of the swimming pool season and check daily that level of chlorine at 1 ppm and the pH between 7.0 and 7.6.

If your saline electro chlorinator does not have a RedOx chlorine controller you should use a measuring guage. Even if your pool is equipped with an automatic Redox control it is necessary to manually check the chlorine on a very regular basis (daily). This prevents the chlorinator producing more chlorine than necessary, which could bleach the liner and irritate eyes.

It is necessary that the TA level is maintained between 100 and 175ppm

TA (total alkalinity) represents the water’s capacity for neutralising acids. A balanced TA level keeps pH from fluctuating and getting out of control. A TA level under 100 ppm turns water corrosive. Damage to the liner would be irreversible. We recommend checking the PA level weekly or after rainfall.

Protect your swimming pool in summer and winter and do not empty it

Swimming pools are built to be full of water. They should not be left empty for long periods of time.

In the summer keep the water level constant. In winter protect skimmers and filter systems against frost. Ask a pool specialist for the best winter treatment to keep the water in perfect condition the following season. Above all cover the swimming pool in winter.

Water from wells, or of unknown origin should be analysed and, if necessary, treated before it is used to fill or top up the pool.

If the water does not come for the mains supply or from a guaranteed tanker it is very probable that the water will contain diluted metals such as iron, copper or magnesium.

These minerals can react with the chemical products and produce stains on the liner. If this happens ask a specialist to carry out a treatment with RENOLIT ALKORPLUS Antistain.

No chemical products should come into direct contact with the liner

The correct and safest way of introducing any chemical product into the swimming pool is by using the skimmer with the circulation pump working. If it is powder, granules or liquid and it is required to be put directly into the swimming pool, it must be diluted before in a bucket of water, and poured into different areas of the swimming pool. The circulation pump must always be in use to prevent concentration of a product in one area.

Avoid the use of floating dispensers because they can spend too much time in the same position and can bleach the liner.

Do not use chemical products which contain copper

Always read the level of the composition of the chemical products that you use, especially those for algae. Some anti-algae products contain copper sulphate, these should be avoided. Use anti-algae with a quaternary ammonia base. These are the best products for your hair and your skin. If by accident you have used a product containing copper, you should apply RENOLIT ALKORPLUS Antistain.

Avoid a build up of dirt and calcareous deposits on the waterline

The lacquer that protects the RENOLIT ALKORPLAN laminate will repel dirt; however, low maintenance and high bathing loads will accelerate the build up of waterline deposits. Regular cleaning of the waterline with RENOLIT ALKORCLEAN applied with a sponge or cloth will prevent the build up of grease and scale and avoid permanent staining.

Never use abrasive tools or aggressive cleaning products

Do not use aggressive chemical products or cleaning equipment, such as solvents; brushes with wire or stiff bristles; and abrasive pads or cloths that will damage the membrane. The liner is coated with a protective lacquer which is stain and dirt resistant, however it may be damaged if cleaned with abrasive materials or solvents. RENOLIT ALKORCLEAN is an ideal and efficient cleaner for your liner. It may be ordered though your Swimming Pool Specialist.
